Building Permit Fees

A single permit will be issued for new construction and major renovation projects. The general contractor is responsible for providing the name, business license number, and state license number for all subcontractors.

For structures, the valuation of any proposed construction will be determined either by contract price indicated on the permit application or by utilizing the per square foot value determined from the Standard Building Valuation Data table published by the International Code Council in the month of February each year, whichever is greater. The most recent February publication will be used. This value will then be applied to the fee schedule.

For nonstructural jobs, the valuation will be based on the contract price of the job. If the Building Official believes there is a discrepancy in the job cost given, he may refer to the ICC for the valuation of the job.

A plan review fee will be charged on building permits that involve a structural component, solar panels, swimming pools, and ALL commercial jobs. Plan review fees are 50% of the cost of the permit. These are due at the time of submittal.

Cost of Job (Including labor and materials): \$ _____

- Permit Fee (see below for calculation) \$ _____
- Plan Review (1/2 of the permit cost) + \$ _____
- Residential Sewer Tap _____ X 500.00 + \$ _____
- Commercial Sewer Tap _____ X 1000.00 + \$ _____
- Fire Department Plan Review (one time fee) + \$ 100.00

Additional Gross Receipts to Business License + \$ _____
